# POEM: PERSONAL OFFICE ENERGY MANAGER

Double click reveals global view of Energy consumption using garden metaphor

Task bar element signals 'good' or 'bad'

# Potential Areas of Common Interest

- Personalizing Energy Consumption- effective user experience for energy reduction
- Compute Models and their resulting Energy consumption models- energy accounting for cloud computing
- Sensor Database, and info tracking for managing 'Green Lease'- who's consuming energy, and how should it be billed
- Sensor Database, and linking multiple buildings into and Eco-District- energy management across the microgrid
